

## COLORIFIC ALT-J3 INK MIMAKI JV3 'MIX & MATCH' FORMULA

Formulated as a 'Mix & Match' solution for users of OEM Mimaki SS2 inks for the JV3 printer. The colour and physical properties of the original OEM inks have been matched so that existing profiles and printer settings can be used.

### ALT-AJ FEATURES & BENEFITS

- Colour and performance matched to JV3 SS2 ink
- Mix & Match compatibility for use alongside OEM ink
- Use existing OEM colour profiles
- Full Solvent ink chemistry
- Good adhesion and chemical resistance
- Good jetting properties
- Excellent print head stability

### MIMAKI JV3 USERS MIX & MATCH

- Formulated as a Mix & Match solution for users of the Mimaki JV3 printer series running OEM SS2 inks.
- Based on extended field testing, in all vital areas of ink performance, we see Alt-J3 as a viable JV3 ink alternative.
- Mix and Match means the ink is an accurate colour match (no reprofiling is required) and can be used without flushing of the previous inks - Alt-J3 inks can be used in your printer alongside your existing Mimaki SS2 inks, making it an easily adopted and completely plug and play solution.
- Extended field testing has also shown improved scratch resistance, abrasion resistance and chemical resistance.
- Further added benefits are also delivered; in prolonged field testing, Colorific Alt-J3 inks have proven to assist in reducing head blockages, nozzle deflection, and offer an extended life expectancy for the printheads and the entire ink feed assembly (dampers, wipers, tubing and pumps).

### RELIABLE PERFORMANCE

- Extensive testing is carried out on Colorific inks during both development and production phases ensuring that Colorific inks are up to the most demanding of print jobs.
- Full hardware and UV fade resistance warranties.
- Extended shelf-life of 18 months.
- Suitable for high speed production printing.

### PRODUCT OVERVIEW

- Compatible with Mimaki JV3 series printers and similar large format print systems that utilise Epson DX4 printheads.
- A chemically balanced blend of solvents combined with the highest quality pigments, offering uncompromised performance and reliability.
- Colorific Alt-J3 inks give you the ability to print photo-realistic images onto uncoated materials that don't rub off or require a protective coating.
- Excellent resistance to alcohols and cleaning fluids.
- Outdoor durability without need of lamination.
- Very high abrasion and scratch resistance.
- Superb adhesion to a wide range of common media.

### JV3 PRINTER WARRANTY UK ONLY

- An alternative warranty can be provided for Mimaki printers through your Colorific Reseller. This warranty aims to exceed OEM warranty in terms of response speed, parts covered, and overall value. Ask your Reseller for details.
